VIANU

PROCESS AND TASKS IN THE PILOT

Who does what in the pilot with 10 employees.

Your business

- You decide which employees take part. Taking part is voluntary.
- You register the team with VIANU. Your contact at VIANU is Roderich.
- You receive the insoles at the workplace.
- Effort for your staff: In a few hours you set the test group, approach the participants and briefly explain the process.

Your team

- Each person who takes part photographs their feet with their own smartphone during a break. Each foot capture needs 6 photos. There is no measurement day and there are no additional devices.
- The insole goes into shoes your employees already own.
- At the end each person answers four questions about the insole.
- Your employees pay nothing.

VIANU

- With our partner SELFWEAR AI the feet are measured to the millimeter and modeled as a personal insole.
- VIANU makes a custom-made insole for each person by 3D printing, locally in Germany. Name and company logo are printed on it.
- The insole reaches your employees at the latest 7 days after the foot capture.
- At the end VIANU sends you an anonymized results report at group level.

Price and reply

A pilot with 10 employees costs EUR 1,200 plus VAT. We reply to a contact request within 5 working days.

Period until evaluation: We agree the period with you in conversation.
